Learning Management System(LMS)
(Final Project – HIST Jamshoro)

A learning management system (LMS) is a software application for the administration, documentation, tracking, reporting and delivery of e-learning education courses or training programs.

Colleges and universities use LMSs to deliver online courses and augment on-campus courses. Corporate training departments use LMSs to deliver online training, as well as automate record-keeping and employee registration.

Project:

Features:

- 1) Course Content Delivery.
- 2) Student Registration and Administration.
- 3) Reporting.
- 4) Training Record Management.
- 5) Resource Management.
- 6) User Management.
